

Split System & Through Wall Unit Mounting Accessories

Technical Descriptions

Bebco Model WMB-SCU Wall Mount Brackets are accessories that permit the installation of Model SAC and SHP Split System Condenser Units with proper rear side clearance to an exterior wall of a stationary or portable structure.

Bebco Model WMB-STU and WMB-PTU Wall Mount Brackets are accessories that enhance the support of Model TAC or THP Through Wall Air Conditioner and Heat Pump Units if the framed opening or a stationary structure lacks sufficient integrity or if the structure (such as a portable lab) will be subject to frequent transportation.

These Mounting Brackets are fabricated from 304 or 316 grade stainless steel to ensure maximum corrosion resistance, and can be provided with any paint finish desired. Please note due to the range of wall compositions, fasteners are not provided.

Specifications

Model WMB-SCU Split System Condenser Unit Mounting Brackets

Dimensions: 26" High x 26" Deep x 2" Wide
 Mounting Bolt Slots: 0.40" Wide (for 3/8" Bolts)
 Configuration: Universal - Suitable for left or right side for use with all Condenser Units
 Material: 12 Gauge 304 or 316 Grade SS
 Weight Capacity: 220 Pounds Over Maximum Load
 Finish Options: 2B, Urethane Spray, Powder Coated or Custom, per Client Specifications

Model WMB-STU & WMB-PTU Stationary & Portable Through Wall Unit Mounting Brackets

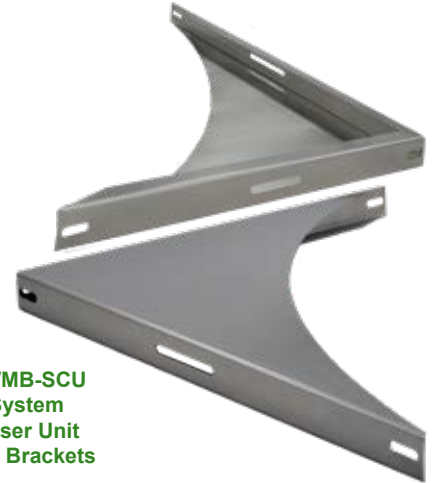

Dimensions: 14" High x 14" Deep x 2" Wide
 Mounting Bolt Slots: 0.40" Wide (for 3/8" Bolts)
 Configuration: Left & Right Side, Mirror Image for use with all Through Wall Units
 STU Unit Support: Adjustable Swivel Head Pads
 PTU Unit Support: Shock Absorbing Mounts
 Material: 12 Gauge 304 or 316 Grade SS
 Weight Capacity: 220 Pounds Over Maximum Load
 Finish Options: 2B, Urethane Spray, Powder Coated or Custom, per Client Specifications

IMPORTANT NOTES:

1. Maximum Load is defined as the installed weight of the largest and heaviest Split System Condenser Unit or Through Wall Unit.
2. Bebco recommends assessment of all WMB installations by a Structural Engineer, and makes no warranties for, nor accepts any liability for the ability of a stationary or portable structure wall to provide adequate structural support, nor for any damages incurred.
3. The Shock Absorbing Mounts supplied with Model WMB-PTU Portable Through Wall Unit Mounting Brackets feature a mounting stud and locknut for attachment to the brackets and a pan-head bolt to secure the Through Wall Unit case to the Mounting Brackets.
4. All Specifications are subject to change without notice.
